ALPHA 9K

*The extremely compact and lightweight Alpha 9K:
The go-to fixture for location shooting*

ALPHA 9K

The **Alpha 9K** is the only 9K Fresnel on the market. Whether it's creating a soft Fresnel look or a hard shadow, the Alpha 9K gives users the tool they need to get the job done. Additionally, the specially designed air ventilation system allows heat to be dissipated efficiently. In fact, it runs so "cool," it can be illuminated in the straight down position.

Extremely Lightweight

"Open-Eye" HMI fixture converting to a very small Fresnel by a unique Drop-In Flood Fresnel Lens reducing overall fixture weight

Reflector and Chariot

Revolutionary Quartz Composite Reflector - 15% brighter than standard aluminum reflectors

Cooling

Combination of high-efficiency small Quartz reflector with computer- designed structural air vents provides efficient convection cooling in any operating position - even pointing straight down

Lamp Suspension

Quick and safe release of the lamp via a simple latch on the ceramic G38 socket

Versatility

Alpha 9K Spacelight Accessory can be used with industry standard spacelight accessories to create the brightest daylight spacelight on the market

Alpha 9K

Weight in lbs: 75.00 (86.9 with lens)

Size in inches: 25.6x17.7x30.12

Weight in kg: 34.00 (39.5 with lens)

Size in cm: 65x45x76.5

9K Ballast

Weight in lbs: 54.6

Size in inches: 18.30x10.25x12.20

Weight in kg: 24.8

Size in cm: 46.5x26x31
